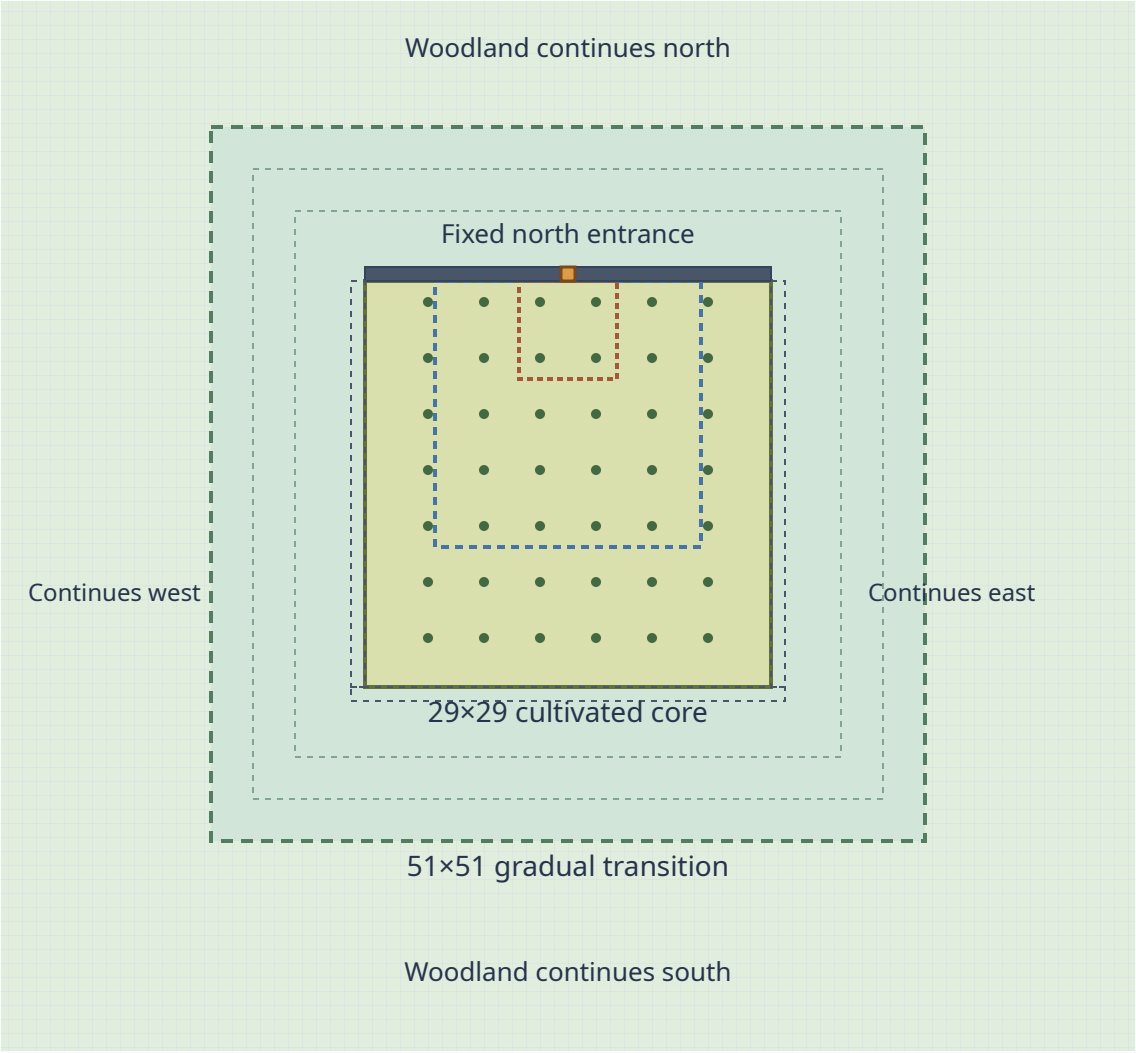
B-0023 · Arboretum tiers and woodland transition

Separate view; no position relative to cabin. True scale: 7 pixels = 1 block. North is up.



Usable floor / clear height

7×7 / 5 · 4 planting positions

19×19 / 10 · 20 positions

29×29 / 15 · 42 positions

Final wall: 29 wide, 15 tall

Final tier: no visible ceiling

39×39: sparse biome clues

45×45: critters and snow cover

51×51: normal biome undergrowth

Dashed lines mark dimensions.

Species and spacing blend gradually.

Dashed outer walls exist only while the arboretum is enclosed.

Final tier: walk around either end of the entrance wall into transition and woodland behind it.

The woodland drawing is cropped, with no reachable outer edge. Planting points show the fixed core grid.

This checks floor dimensions and anchors; allocation, height and doorway behavior need Design verification.
